# Guides to finding IIF resources

## IIF-Manifest

### Waar te vinden?

- [Officieel overzicht](#)
- Metadata op collectiewebsites
- [Detektiif](#) (Chrome en Firefox)

This is a brief guide to finding IIF Manifest URLs from members of the IIF community. These guides begin from a record page, so do not include how to search or view an individual record.

Once you have a manifest URL you can use the [How to use IIF Resources and Viewers](#) guide to open it in one of the many IIF Viewers.

This site is a work in progress, and heavily inspired by the initial work done by St Andrew's University to compile the initial [IIF Resources List](#).

"Copy this link" is the final step in many of the guides and this involves right-clicking and "copy link address" or similar. Alternatively left click to open the link, then copy the address in the address bar.

### Contribution and corrections

If you notice a correction or would like to add to this list please either submit a pull request to [the repository](#) or fill in [this Google form](#) and the IIF Staff will add your entry. If you are submitting through GitHub please read the [Contributing guide](#).
